

State of the Art Medical and Cardiovascular Care

By Elie H. Korban, M.D.

At Delta Clinic, our passion is medicine. We provide the best in cardiac health care, family and urgent care medicine. Stress tests, lab testing, ultrasonography, cardiac echo, and vaccines for children and adults are all available in the comfort of our office setting.

It is our mission to go beyond the boundaries and be West Tennessee's leading cardiology practice by providing ethical, compassionate and state of the art care that exceeds the expectations of our patients. All of our physicians are Board Certified and are Fellows in their field.

Call today for an appointment and experience the best in healthcare. We accept all major types of insurance, including TennCare and Medicare.

Look Your Best 24/7 with Permanent Cosmetics

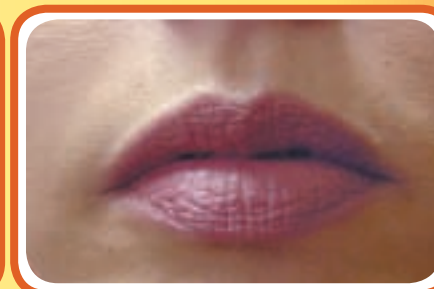

Isn't it annoying? You eat and your lipstick is gone. You cry or swim and your mascara runs. But it doesn't have to happen. Now there is permanent cosmetics. You never have to be concerned about fading makeup no matter what you do. And think about all the time you'd save if you weren't constantly repairing your makeup.

Permanent cosmetics is a revolutionary method of applying micro insertions of natural pigments into the dermal layer of the skin. A natural look, mimicking thousands of tiny eyelashes, with the implantation of pigments in the lash line is very popular. Others prefer a bolder, more definite line. The procedure is great for patients who are allergic to conventional makeup or for contact lens wearers.

The procedure for lip color can change the size and shape of the lips or just the color. It helps prevent lipstick from bleeding into the surrounding skin.

Before

After

Call the Eye Clinic today for a Permanent Cosmetics consultation. We ARE the eye care professionals.
